STANDARD LABELS OR STAMPS FOR UNITED STATES GRADES

As a matter of convenience to beekeepers and in order to provide for uniform marking of the United States grades of honey, the stamps shown here have been approved for use on all United States grades of honey, both comb and extracted. This stamp may be used as a rubber stamp, or as a printed label.

It is recommended that the stamps conform to the styles above illustrated, but they may be ordered in various sizes to conform with the label and size of the container. The United States grades can be used on printed honey labels by leaving a blank space in which the grade can be stamped. The grade also can be stamped on a separate label and pasted on the container. The producer need buy only such stamps as will cover the grades he produces. Usually the producer will not have honeys of all color grades provided for in the grading rules.

INFORMATION ON ORDERING

Orders for stamps may be sent to the manufacturer, The Baumgarten Company, 925 - 11th St., N.W., Washington, D. C., or to the following dealers in beekeeping supplies:
